FULL STACK DEVELOPER

Full-Stack PHP Developer with 2+ years of experience building and maintaining scalable web applications using PHP, Laravel, CodeIgniter, React.js, and MySQL. Skilled in developing APIs, debugging, and performance optimization. Strong background in Agile/Scrum environments, code reviews, and secure coding practices. Familiar with hosting environments (Linux CLI, cPanel, DNS, SMTP, FTP) and eager to apply expertise to WHMCS module and addon development. Eligible to work in Ireland without visa sponsorship.

PROFESSIONAL EXPERIENCE

Associate Software Developer

CODEPOINT Softwares Pvt. Ltd., Ernakulam, India

Sep 2022 - Oct 2024

- Led a team in developing and delivering full-stack web applications using HTML, CSS, JavaScript, React.js, Laravel, and CodeIgniter, ensuring successful project completion within deadlines.
 - Designed and implemented scalable and user-friendly features, optimizing application performance and improving overall user experience.
 - Collaborated with cross-functional teams, including designers, project managers, and QA testers, to ensure effective project workflow and deployment.
 - Enhanced application security and integrated RESTful APIs for improved functionality and data processing.
 - Delivered solutions that increased user engagement and improvement in customer satisfaction.
-

SKILLS

- Programming Languages: PHP, JavaScript, C, C++, SQL
 - Frameworks & Libraries: Laravel, CodeIgniter, React.js, jQuery, Smarty, TailwindCSS
 - Databases & Tools: MySQL, MongoDB, PHPMyAdmin, Postman, Git, PHPStorm, Visual Studio Code
 - Hosting & Protocols: Linux CLI, cPanel/WHM, HTTP, SMTP, FTP, DNS, TLS, SSH
 - Testing & Methodologies: PHPUnit, Unit Testing, Agile (Scrum), CI/CD workflows
-

PROJECTS AND CONTRIBUTIONS

Software Consultant – Hpulcase (Germany, Remote)

Duration: 02/2025 - present

- Collaborated with Hpulcase's technical team to design and implement scalable enterprise software solutions.
- Delivered backend modules using PHP, Laravel, and MySQL, ensuring security, performance, and maintainability.
- Assisted in requirement analysis, architecture design, and system integration for client-facing applications.
- Enhanced system performance by introducing modular code structures, automation, and best practices.
- Contributed remotely to successful deployment and smooth operation of critical software modules.

Token Management System – Hospital Workflow Automation (India)

Duration: 11/2024 - 01/2025

- Designed and developed a real-time hospital token management system to streamline patient flow across departments.
- Built a user-friendly interface using PHP, JavaScript, Bootstrap, and Laravel (later integration).
- Integrated Laravel Broadcasting for live token updates, ensuring instant synchronization across devices.
- Enhanced system reliability with robust error-proof logic for token generation, hold, and call-next functionalities.
- Delivered a scalable solution improving hospital operational efficiency and reducing patient wait times.

EDUCATION

Bachelor of Computer Application (BCA)

Mahatma Gandhi University, Kottayam
Graduated: April 2022

Computer Science

St.Ephrems HSS, Mannanam
Graduated: March 2019

SOFT SKILLS

- Leadership and Team Management
- Problem Solving and Critical Thinking
- Time Management and Prioritization
- Collaboration and Cross-Functional Teamwork
